REPORT OF THE TRUSTEES

We are pleased to present before you the **ANNUAL REPORT** of **SAHARA MUTUAL FUND** for the year ended March 31, 2012.

Overview of Debt Markets in 2011-12

The financial year 2011-12 was a challenging year for Indian economy. While the complex and conflicting choice between growth and inflation remained, the deteriorating economic fundamentals posed further challenges to the policy makers.

The year showed the weak government finances – falling revenues and exceeding expenditure. Burgeoning fiscal deficit and subsidy bills and shortfall in revenue (The tax collection and disinvestments target was missed) led to higher fiscal deficit. The external sector also remained under pressure with Current Account Deficit turning negative after many years. Rupee depreciated by 14% y-o-y vis-a-vis USD.

The headline inflation cooled down to around 6.9% since January 2012, but the core inflation and food inflation remained in risk zone. On the other hand, The IIP for the year plummeted to 3.0% average growth in 2011-12 on the back of dwindling investment demands and uncertain external environment.

The external factors remained volatile, with danger of sovereign default and EU dismemberment gained currency. The geopolitical tension in Iran and North Korea further aided uncertainty.

RBI remained cautious under given circumstances and cut the CRR only in the fag end of the financial year (9th March, 2012) and indicated softer rate regime to boost industrial and GDP growth. Market participants were however cautioned against any steep cut going forward. The government also remained on sidelines with no effective policy actions or announcements were made.

Overview of Equity Markets in 2011-12

Equity markets in India witnessed negative growth in FY11-12 on the back of various challenges faced at the domestic level like high inflation, monetary tightening, depreciating rupee, policy paralysis on the part of government. Nifty gave returns of -9.23% and CNX Midcap gave returns of -4.09% during the financial year ending 31st March, 2012. Among the sectoral indices Pharma, FMCG and Auto were outperformers while Metals, Capital Goods and Construction were underperformers.

The year started on a positive note with above average monsoon resulting into good production of crops and record food grain production. This was positive for the agriculture sector to have an expected 4% overall growth for FY11-12. The food inflation for FY11-12 came down from a high of 9.74% in April 2011 to 6.90% in March 2012 easing the food inflationary pressures.

High inflationary pressures till Oct. 2011, forced RBI to announce strong monetary policies in the beginning of the financial year and subsequently, decelerating growth and declining inflation momentum prompted monetary policy to move to a neutral stance since December 2011. Some easing in liquidity was effected through a total of 125 basis points reduction in the Cash Reserve Ratio (CRR) during January-March 2012.

High fiscal deficit was a concern, going into the budget in the second week of March 2012, but no prudent measures were indicated for reduction of fiscal deficit. Budget was almost a non-event and markets therefore reacted negatively. This was followed by the warnings of country rating downgrade by international agencies that were concerned over inaction by the government to reign in fiscal deficit. High current account deficit led to rupee weakening from levels of ₹ 45 to ₹ 52 resulting into reduction of import cover to less than 6 months near the end of March 2012.

A major factor contributed to the fall in equity markets and that was lackluster FII participation. FII's net buying for the financial year 2011-12 was ₹ 22091 crores approximately as compared to ₹ 48838 crores inflow by FII in 2010-11. The proposal to introduce General Anti-Avoidance Rule (GAAR) from the ensuing financial year and the government's policy to retrospectively tax transactions and the flow of money coming through tax havens, only worsened the sentiment of the FII's to invest into India. Domestic institutions were sellers in the last financial year to the extent of ₹ 5348 Crores approx.

Currently the global growth is facing risks of a mild recession in the euro area, slowdown in emerging and developing economies (EDEs) including China, and surging crude oil prices. However high liquidity from the extended easy monetary policy regimes globally has associated risks for capital flows to the EDEs.

1. Scheme Performance, Future Outlook and Operations of Sahara Liquid Fund

| Performance as of March 31, 2012 | 1 year | Since inception | Inception date |
|---------------------------------------|--------|-----------------|----------------|
| NAV (%) VPO - Variable Pricing Option | 9.4865 | 7.5539 | 19.02.2002 |
| FPO - Fixed Pricing Option | 9.4509 | 6.7980 | |
| CRISIL Liquid Fund Index (%) | 8.4435 | NA* | |

As on March 31, 2012, the scheme had invested 100% of its net assets in money market instruments and net current assets.

DEBT MARKETS

Last year has decelerated the growth momentum of the economy and brought to the fore many interlinked structural issues. The foremost being the poor government finances, depreciating rupee, faltering IIP and still threatening core inflation.

The year ahead is expected to refocus again on the fundamentals. Debt market per-se is expected to operate in conflicting views at least for some time. While RBI has indicated the softer rate regime, the quantum and the steepness of the rate cut is still uncertain. Though headline Inflation has softened, core inflation still poses the risk and much is dependent on monsoon, oil price hike, fiscal gap and Rupee movement. External factors may also have ramification on debt market.

Going forward, even though slowing growth and modest recession is being accepted paradigm globally and softer rate regime is expected policy bias; it may take a bit longer time for the emergence of clear cues and rate direction. Shorter segment of the yield curve may track liquidity which is expected to be tight unless some policy actions are taken by RBI. The low credit off-take may however, address some of the liquidity concern.

EQUITY MARKETS

RBI is expected to cut rates to support growth and the government to reduce its fiscal deficit in the wake of downgrade warnings from the international rating agencies. We remain cautious of populist policies from the government in the wake of elections in the next financial year. Inability of the government to reduce fiscal deficit due to lack of support from coalition partners may stoke inflationary pressures, limiting the ability of RBI to reduce rates and create further downward pressure on corporate earnings through slowing demand and high financing costs. The upside risks to inflation on the one hand and the depressed domestic growth outlook on the other, warrant calibrated measures to maintain a sustainable balance in a dynamic growth-inflation scenario.

7. Role of Mutual Funds in Corporate Governance of Public Listed Companies

Policy on Attending AGM/EOGM of Investee Companies

Introduction

Sahara Asset Management Company Private Limited, acts as an Investment Manager ("The AMC") to the schemes of Sahara Mutual Fund ("Fund"). The general voting policy and procedures being followed by the AMC in exercising the voting rights ("Voting Policy") is given hereunder.

Philosophy and Guidelines of Voting Policy

The AMC has a dual responsibility of a prudent fund manager investing investor money as well as of an entity performing the responsibility of protecting the investor interest. As part of the management of funds, irrespective of the scheme, the AMC ensures that investments are made in companies that meet investment norms. It is expected that the investee company adheres to proper corporate governance standards. The voting policy for the investee companies by the AMC is as under:

The AMC shall deal with voting on case to case basis. For this purpose, the AMC shall review various notices of AGM/EOGM received from the investee companies from time to time and decide whether there are some issues on which the voting decision (favourable/unfavourable) is to be taken. The AMC would generally agree with the management of the Investee Company on routine matters, but may object by voting against if it believes that the interest of the shareholders are prejudiced in any manner.

As regards non-routine items the Fund Manager-Equity with assistance of the Equity Research Department and in consultation with the Chief Investment Officer shall review each of such cases and make specific recommendations to the Chief Executive Officer. In case the AMC is against any non routine item, it may decide to attend the meeting and vote against. In some other such cases, it may decide to abstain based on one or more of the factors like our small holding in the company, location of the meeting place, time / cost involved etc. For these instances, the reasons for non attendance will be recorded.

As per the decision taken by the AMC, it may depute an authorized person to vote in AGM/EOGM appropriately keeping in mind the interest of unit holders. AMC would maintain a record on the AGM/EOGM voting related matters.

Disclosure of Voting policy and Maintenance of Records : This Policy on attending AGM / EOGM and suitable disclosure thereof will be made available on the website www.saharamutual.com.
