## REPORT OF THE TRUSTEES

We are pleased to present before you the **ANNUAL REPORT** of **SAHARA MUTUAL FUND** for the year ended March 31, 2009.

### Overview of Debt Markets in 2008-09

The year was one of the toughest for the world economies since World War II. We saw centuries old institutions failing, one of the biggest corporations going bankrupt, millions losing their job worldwide. The central banks across the world cut policy rates which apart from bringing some relief to the financial system, fuelled commodity prices of crude, steel, gold and food prices. Inflation touched a thirteen year high of 12.63%. Banks suffered losses on account of mark-to-market their investment portfolios which called for fresh capitalization of various banks. The economic activity came to literal stand still. In India, corporate started to feel the heat with their drawing limits either curtailed or not renewed due to the fear of NPAs and future prospects. To counter this situation RBI kept on easing policy rates like CRR and Repo in an attempt to make the credit availability on easy terms. The gilt prices also witnessed volatile trend during the year mirroring the liquidity conditions.

### Overview of Equity Markets in 2008-09

The equity markets in India and across the world went through a phase of turbulence in 2008-09. Indian equity markets, which were integrated with the world financial system, could not escape and closed 2008-09 with a loss of 36%.

At the beginning of the financial year high double digit inflation due to high commodity and oil prices prompted RBI to increase interest rates to 9.00%. High inflation coupled with high interest rates began to eat into the profitability of the corporates especially those belonging to the SME segment. As the global financial crisis deepened, oil & commodity prices corrected. The collapse of Lehman Brothers only exacerbated the ongoing crisis. India too was impacted by the global economic & financial crisis. After clocking annual growth of 8.9% on an average over the last five years (2003-08), India was headed for a cyclical downturn in 2008-09 as the full impact of the crisis began was felt in the third quarter, which recorded a sharp downturn and registered a low 5.5% GDP growth.

To counter the down turn the Government of India announced three fiscal stimulus packages along with RBI easing the monetary policy by reducing its benchmark rates to less than 5.00% These stimulus packages were on top of an already announced expanded safety-net program for the rural poor, the farm loan waiver package and payout following the Sixth Pay Commission report, all of which too added to stimulating demand. As the economic indicators begin to point towards a recovery, we witnessed equity markets gaining some of the last ground towards the end of the financial year.

## 1. Scheme Performance, Future Outlook and Operations of Sahara Banking & Financial Services Fund

Performance as of March 31, 2009	Since inception	Inception date
Sahara Banking & FS Fund (%)	5.08	16.09.2008
CNX Bank Index (%)	(32.61)	

The scheme gave a return of 5.08 per cent as against the benchmark negative return of 32.61 per cent since inception.

As on March 31, 2009, the scheme had invested 91.01 % of its net assets invested in equities and the balance 9% in net current assets. There has been no dividend declared during the year 2008-09 under the scheme.

### Market Outlook for 2009-10

#### Debt Markets

The GDP growth rate is projected at 7.0 – 7.5% for the year 2009-2010. This growth can be achieved by fiscal stimulus; innovative public spending and prudent measures could stimulate demand. With congress Government getting clear mandate, we may expect the reforms to take priority. Considering the widening fiscal deficit situation, we may expect an upward revision in the borrowing programme and yields to harden further in the second half of the fiscal year.

#### Equity Markets

India's growth is amongst the fastest in the world and with a locally driven economy - consensus estimates for India's GDP growth range from 6- 7% vs. projected contraction in the world GDP by 1-1.5%. The fiscal year 2009-10 is likely to be one where specific sectors and company performances could be much better than broader market indices. The challenge will be to pick these stocks and sectors ahead of the market. The policy initiatives by the new government would be critical for a pick-up in investments in the short-term as well as for overall growth in the economy.

## 2. Brief Background of Sponsor, Trust, and AMC Company

### a. Sahara Mutual Fund
